

Overlander Game

Before you can play, the game documents must first be printed out and cut.

Tips

To make the playing cards and the play money last longer, they are preferably printed out on stronger paper (120g / m²). You can also coat them with transparent cling film before cutting them. The same applies to the game board.

To prepare

Game board

- Print out the corresponding PDF file on a colour printer and then trim where necessary
- It is best to stick the single sheets onto a stable cardboard. Possibly it is better to divide the pages into foldable individual pieces so that the game board is smaller to store.

Playing cards and play money

- Print out the individual PDF files on a colour printer and then cut them

Additional material

The following parts are not included in the set and must be organized separately:

- 1 dice
- 4 playing figures
- 64 chips for the highlight control card (can also be beans, stones or other objects)
